*** ANNOUNCEMENT ***

--File 990 - NewsRoom now contains May 2002 to present records.

File 993 - NewsRoom archive contains 2002 records from January 2002-
April 2002. To search all 2002 records, BEGIN 990,993.

--Alerts has been enhanced to allow a single Alert profile to be
stored and run against multiple files. Duplicate removal is available
across files and for up to 12 months. The Alert may be run according
to the file's update frequency or according to a custom
calendar-based schedule. There are no additional prices for these
enhanced features. See HELP ALERT for more information.

--U.S. Patents Fulltext (File 654) has been redesigned with
new search and display features. See HELP NEWS 654 for
information.

--Dialog NewsRoom is now available. BEGIN NEWSROOM
to use the files in a OneSearch. See NEW FILES RELEASED
(below) for individual file numbers.

--Connect Time joins DialUnits as pricing
options on Dialog. See HELP CONNECT for
information.

--CLAIMS/US Patents (Files 340,341, 942) have been enhanced
with both application and grant publication level in a
single record. See HELP NEWS 340 for information.

--SourceOne patents are now delivered to your
email inbox as PDF replacing TIFF delivery.
See HELP SOURCE1 for more information.

--Important news for public and academic

libraries. See HELP LIBRARY for more information.

--Important Notice to Freelance Authors--

See HELP FREELANCE for more information

TITLE: Asset Allocation Strategies for Personal Pension Contributions

AUTHOR(S): Kim, Chang-Soo; Wong, K. Matthew
 AUTHOR(S) AFFILIATION: Yonsei U; St John's U, Jamaica, NY
 JOURNAL NAME: Financial Practice and Education,
 JOURNAL VOLUME & ISSUE: 7 2,
 PAGES: 35-46
 PUBLICATION DATE: Fall-Winter 1997
 AVAILABILITY: Publisher's URL
 ISSN: 1082-0698
 DOCUMENT TYPE: Journal Article
 ABSTRACT INDICATOR: Abstract

ABSTRACT: This paper examines the **asset allocation** strategies for retirement savings. Because of the unusually long investment horizon and the effect of compounding, a suboptimal asset mix in a retirement plan can be a very costly and irreversible mistake. Instead of relying on anecdotal evidence to evaluate the merits of different allocation strategies, this research employs a large number of simulations and stochastic dominance tests using asset returns since 1926. The results show that the optimal **asset allocation** strategy for the individuals defined contribution pension plan should be highly equity dominated until the individual is close to retirement. Moreover, international investments apparently do not enhance the **portfolio** value in the **retirement planning** context where, theoretically, **portfolio return** volatility is not a major concern.

Financial Planning, p69-84, Oct 1, 1999
DOCUMENT TYPE: Periodical LANGUAGE: English RECORD TYPE: Fulltext
WORD COUNT: 4,980

ABSTRACT: In a roundtable discussion, financial planners Linda S. Lubitz, Laura Tarbox, John A. Brown, and Lou Stanasolovich discuss the future of the financial planning business. Most of Lubitz's clients are in for the long run and have not expressed much concern about Y2K. Stanasolovich has not had any clients ask him to move money out of REITs, but he thinks if he had 2 more years, it might become an issue. Tarbox has been moving in the direction of individual stocks in the last couple of years. Brown is not seeing more competition from PricewaterhouseCoopers, KPMG or Merrill Lynch and their financial services groups in South Alabama. However, Tarbox sees much competition from these firms in Newport Beach.

Power To The People: Options, access and advice are helping employees

become powerful investors through their defined contribution plans
Phipps, Melissa
Financial Planning, p177-192, Jul 1, 1999
DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract
Fulltext
WORD COUNT: 02066

ABSTRACT: With more options, access, and advice than ever before, qualified plans are giving millions of American workers more power over their investments - and over their retirement in general. Buck Consultants of New York recently surveyed 646 employers with 401(k) plans and found that, on average, employers offered 10 investment vehicles in 1998, with the most common being growth funds (85%), international funds (71%), balanced funds (68%) and index funds (61%). Education and advice are still major issues for plan providers. According to the Buck survey, the vast majority of employers (89%) are taking steps to teach their workforce about savings and retirement principles. Another almost essential requirement for plan providers is account viewing access via the Internet. A lot of employers are specifically asking about account viewing or informational capability now.

Thoughts on positioning and success

Thamara, Thomas

US Banker, v108, n11, p82-84, Nov 1998

DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract

Fulltext

WORD COUNT: 01475

ABSTRACT: Six preferred community bank positioning models for success are: 1. supercommunity bank with autonomous multistate affiliates, 2. supercommunity bank with a single-state focus, 3. niche focus, 4. middle-class down or mass-market focus, 5. people/core values focus, and 6. **portfolio** manager. Superior community banks have characteristics that include: 1. a strong, dynamic, hands-on and almost collegial senior management team; 2. motivated, skilled, and trained employees; 3. investment in training and career development; 4. competition not on price but on quality; and 5. a cross-pollination of ideas and practices from high-performing banks and nonbanks.

In the wake of the correction

Smith, Brian

America's Community Banker, v7, n10, p42-43+, Oct 1998

DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract
Fulltext

WORD COUNT: 02398

ABSTRACT: The market correction before Labor Day 1998 gives financial professionals a chance to take stock of the overall market situation. One common industry response seems to be that finally there is likely to be an uptick in anemic deposit inflows as parking lot funds appear at the teller window. The downside about such funds is that they are not core deposits and cannot be deployed into regular **portfolio** loans. It is absolutely inevitable that the 25%+ returns common throughout the 1990s-to-date cannot indefinitely continue for the market averages. **Asset allocation**, given the customer's risk tolerance, is actually a one-time decision with, at most, occasional tweaking - at least, for long-term funds. For most customers with limited initial resources for their **retirement planning** base, it would be far more useful to be able to help them figure out where they are with their likely Social Security income and start from there.

Help employees sort through their 401(k) investment options

Knapp, Scott D

Credit Union Magazine, v64, n2, p17-18, Feb 1998

DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract
Fulltext

WORD COUNT: 01193

ABSTRACT: The Small Business Job Protection Act of 1996 allows tax-exempt organizations to offer Internal Revenue Service Section 401(k) retirement plans to their employees. Many credit unions have seized this opportunity by using 401(k) programs in their efforts to recruit and retain quality employees. Unfortunately, the financial media have inundated the public with so much investment advice that many investors do not know whom or what to believe. Steps for good decision-making for investment choices include: 1. understand risk and **return**, 2. examine risk tolerance, and 3. use **asset allocation**.

Insurers won't succeed doing business as usual

Mayewski, Larry G; Albanese, Michael L; Brey, David A; Pallay, Gary S; et al

Best's Review (Life/Health), v96, n9, p40-52+, Jan 1996

DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract
Fulltext

WORD COUNT: 21007

ABSTRACT: In a new age of financial services, the insurance industry is being forced to decide what business they are in and to sharpen the strategic focus accordingly. While a number of companies will thrive in the current competitive environment, many will not. All will need leaders who understand the organization's strengths and weaknesses and make the decisions necessary to put the company on the right path. For many, that will mean acquisitions, mergers and strategic partnerships. While the changes involve a broad range of interrelated issues, the most significant will be in 3 areas - financial services reform, distribution/market conduct and strategic management.

Examining the non-bank mystique

Bel Bruno, Ron

Bank Technology News, v8, n8, p1,15+, Aug 1995

DOCUMENT TYPE: Journal Article ARTICLE TYPE: News LANGUAGE: English

RECORD TYPE: Abstract Fulltext

WORD COUNT: 01800

ABSTRACT: Nonbank institutions are rapidly stealing away banks' share of deposits and other investment products. Customer service, enlightened retail delivery strategies, and the incorporation of multiple channels - including branch offices, automated- and live-phone assistance, and PC-based transactional services - have gone a long way to help retail brokerages garner impressive results in new account openings, account retention, and **return** on equity.

Winning with mutuals: Performance is not enough

Deutsch, Hunting F

Bank Management, v70, n6, p66-70, Nov/Dec 1994

DOCUMENT TYPE: Journal Article LANGUAGE: English RECORD TYPE: Abstract Fulltext

WORD COUNT: 02149

ABSTRACT: More than 500 investment companies now manage more than 5,500 mutual funds in a business that exceeds \$2 trillion. SunTrust Banks began thinking about running its own proprietary mutual funds in the late 1980s and early 1990s. In Florida, the SunTrust move into mutual funds quickly tapped a huge market of bank customers unable to invest the high minimums required for trust services. The overriding message for SunTrust: To be a full-service, mutual-fund player, maintain all service levels to all customers and make them easily accessible. It obviously takes a long-term commitment to be in the mutual-fund business. To be proprietary players, banks will have to compete with the vast amounts of dollars that non-bank mutual-fund providers spend nationwide on marketing, and with the expansive networks traditionally built and sustained by regional brokerage firms.

Diversification cuts risk, lifts return

Gobeil, Christopher

Financial Post, p26, Mar 20, 1993

DOCUMENT TYPE: Newspaper Article LANGUAGE: English RECORD TYPE:
Abstract

ABSTRACT: The best way to assure a safe investment **portfolio** is through diversification, of which there are three types. Security diversification means using more than one term on investments at more than one institution; **asset allocation** diversification involves splitting the **portfolio** among different types of investments, chosen to fit the investor; and international diversification may be attractive, depending on the amount of risk which can be taken. The best international investment for Canadians is probably in the United States.

Interactive software eases 401(k) planning

Anonymous

Bank Marketing, v26, n10, p56, Oct 1994

DOCUMENT TYPE: Journal Article ISSN: 0888-3149 JOURNAL CODE: BNM

LANGUAGE: English RECORD TYPE: Abstract Fulltext

ARTICLE REFERENCE NUMBER:

WORD COUNT: 00277

ABSTRACT: The 401K Planner is an interactive software program that is designed to help a human resource administrator, or other employee, construct a 401(k) plan. The software program has several sections that can help bankers compose a tailored 401(k) plan for corporate clients.

TEXT:

The SoftAd Group and Bright Ideas, Inc., both of Mill Valley, Calif., are marketing an interactive software program that can educate corporate employees to the benefits of various 401(k) plans.

The 401K Planner can be used on a PC in an employee's home or office,

or at a multimedia kiosk. The tool is designed to help a Human Resource administrator, or other employee, construct his or her 401(k) plan.

"The 401K Planner is [both] a 'business to business' and 'business to employee' solution for a complex financial area," says Elisa Harnquist, a spokesperson for The SoftAd Group. "Individual employees' concerns about **retirement planning** are growing...The 401K Planner will save companies time and money," adds Harnquist.

The software program has several sections that can help bankers compose a tailored 401(k) plan for corporate clients. For example, bankers can use the program's Funds section to create a database of available mutual funds and investment products. Further descriptors can identify the investment's category and objective and provide a product description.

The Planner's other functions allow administrators and bankers to establish rules for tailored plans, define **asset allocation** models, set acceptable rates of **return** for each investment category and duplicate master diskettes for client companies.

The "business to employee" features help consumers learn which 401(k) plans they may find desirable. The software program's consumer-oriented sections are:

- * Investment Fundamentals
- * How Much Money Do I Need for Retirement?
- * Plan Rules
- * Investment Products
- * What Kind of Investor Am I?
- * Create a 401(k) Investment **Portfolio** .

For more information about The 401K Planner, contact The SoftAd Group; (415) 332-4704. To reach the company on the East Coast, dial (203) 323-2346.
